

Long Beach Community College District

Advanced Transportation Technology Center (ATTC)

Did you know that all CNG cylinders are required to have periodic safety inspections and proper records kept?

“CNG Cylinder Safety Inspection and Certification”

Learn the regulations and proper required periodic inspection of cylinders used in Compressed Natural Gas vehicle applications. In this two-day class, designed for all technicians and management, inspection standards and techniques are covered along with acceptable damage and corrective actions. Notebook & study materials included in course fees. Optional CSA Certification exam available upon completion of class for an additional fee.

Date/Time: Call for latest schedule

Cost: \$550 Includes all Training Materials.
(Optional CSA Exam fees not included)

Note New CSA fee structure as of Aug. 1, 2008: Optional CSA Exam is an Additional \$375 fee which is forwarded directly to CSA America
